

SWIFT RESPONSES, EVIDENCE-BASED ANSWERS FOR NECK AND BACK PAIN

*Compassionate, actionable
knowledge that can quickly set
you on the path to recovery is
Stridewell's visionary approach.*

"You will receive attention on the same day you reach out to us for help," assures Igor R. Yusupov, MD, Medical Director at Stridewell, a new, immediate-medical-care concept in the greater Phoenix area conceived to specifically address spine problems.

Uniquely designed for ease of access, patient comfort, and patient education, Stridewell's mission is to eliminate the paper shuffling and appointment wait times that can delay a diagnosis and the launching of a treatment plan—even as a patient endures pain and the fear of the unknown.

TOP-QUALITY EXPERIENCE

"If your life has been derailed by back or neck pain, wait times for an appointment with a doctor—or a visit to an expensive and crowded emergency room—can significantly add to the stress," says Dr. Yusupov, a highly respected neurosurgeon and spine specialist in Scottsdale who actively oversees all providers and audits all patient interactions at Stridewell.

"We value patients' time and have designed our clinic to accommodate a same-day exam and consultation. All people

need to do is visit the website to schedule a time that's convenient for them."

Uncertainty is eliminated at Stridewell. Patients who visit the clinic will consult with a fellowship-trained spine specialist who will review their medical history and symptoms before performing a basic physical exam. Patients leave the clinic armed with a diagnosis and a clear plan of action to regain their health and their lives. Depending on individual needs, recommendations might include everything from over-the-counter medicine to physical therapy or a surgical consultation. Findings and recommendations will even be recorded, so a copy can be saved for follow-up reference.

Dr. Yusupov says the spine specialists at Stridewell are "great communicators, compassionate, encouraging, and highly trained. Putting you on the road to recovery is what they are here to do."

The clinic is open from 8 a.m. to 8 p.m., seven days a week. Awakened by pain during the night? Go online and schedule your consultation at the first available time after the clinic reopens the next day.
