

INNOVATIVE PRACTICE SATISFIES AESTHETIC AND RECONSTRUCTIVE SELF-CARE NEEDS

Cutting-edge group offers comprehensive cosmetic and reconstructive plastic surgery, dermatology, and med spa services.

Mobile Plastic & Reconstructive Surgery and Dermatology specialists focus on cosmetic surgery, reconstructive surgery, dermatology, and nonsurgical cosmetic services. With two locations (Mobile and Fairhope), four doctors, one physician assistant, and a full-service med spa, the breadth and scope of procedures available is unparalleled.

COSMETIC AND RECONSTRUCTIVE SURGERY

Dr. Chris Park, a board-certified Plastic Surgeon, practices cosmetic and reconstructive plastic surgery at The Park Clinic (Mobile) and The Park Clinic Bayside (Fairhope). A graduate of The University of Alabama School of Medicine, he completed his surgical training at Wake Forest University. He maintains privileges at multiple hospitals in Mobile and the Eastern Shore and is well versed in the latest plastic surgery advances and modifications.

"Plastic surgery is a dynamic specialty," Park says. "It's all about how to apply anatomy, concepts, and techniques to come up with a solution to a specific problem. Every patient provides a unique situation, and I enjoy creating unique plans for them. We are always looking for new technology and are on the forefront of how to treat patients safely and effectively."

Park operates on all parts of the body, but breast surgeries account for nearly half of his practice. "I do many cosmetic breast enhancements, which include breast lifts and augmentations. I also do a lot of breast

reductions and achieve great personal satisfaction performing post-mastectomy breast reconstructions," he says.

Park also performs facial cosmetic surgeries, such as facelifts and rhinoplasties, and body contouring procedures, such as liposuction and tummy tucks. He was the first in Alabama to offer SculpSure®, a nonsurgical, laser-based fat-reduction procedure.

**"EVERY PATIENT
PROVIDES A UNIQUE
SITUATION, AND I ENJOY
CREATING UNIQUE
PLANS FOR THEM."**

DERMATOLOGY

"At Mobile Plastic & Reconstructive Surgery and Dermatology, the focus is on medical dermatology," says Park. "Drs. Roberta Swain and Kathryn Dempsey provide extensive care related to diseases and deformities of the skin. Both routinely treat patients with skin cancer, warts, rashes, acne, psoriasis, and other disorders."

MED SPA AT THE PARK

Dr. Chris Park is also the director of the Med Spa at the Park, geared towards nonsurgical rejuvenation.

"Traditional spas are mainly of the 'fluff and buff' variety," he says. "You may walk out shiny and happy, but they usually don't offer de-aging or therapeutic services. We offer nonsurgical medical and aesthetic procedures in the professional, luxurious environment of our Med Spa at the Park."

Park and Dr. Christina Massinople perform many cosmetic procedures in addition to those performed by experienced, licensed aestheticians. Among the services available are lasers and wrinkle reduction using fillers, Botox®, chemical peels, radiofrequency treatments, and facial resurfacing.

"I don't think people realize how much we have to offer," Park says. "When men and women in the Gulf Coast area consider cosmetic or reconstructive surgery, dermatology, or med spa services, they should come to us. With our combination approach, we can make a plan to address many of their needs and desires."
