

CYPRESS

Surgery Center

we operate differently.

Designed with your convenience in mind, Cypress Surgery Center combines the expertise of many of the area's most respected surgeons with advanced technology and personalized care.

Since opening its doors in November of 2000, Cypress Surgery Center has been a reputable fixture in the Wichita community. The 25,000-square-foot, multi-specialty facility continues to offer exceptional, integrated care in a cost-effective environment.

"Though our doctors bring a breadth of knowledge and diverse experiences from across the country, many staff members were born and raised in the heart of Wichita," says Facility Administrator Joyce White. "Our community is unique, and one we have known for almost two decades."

EXCEPTIONAL EXPERIENCE

Home to a comprehensive network of more than 200 industry-leading physicians, Cypress caters to patient comfort and convenience, offering online patient registration to an expansive list of surgical specialties and procedures. The cumulative experience of its surgeons and staff allows the center to pair modern techniques and innovative treatments with a refined approach that ensures patient satisfaction.

Cypress boasts a staff and team of medical professionals that have been working alongside each other for nearly two decades. Their longstanding history is one of pride, having had the pleasure to serve an average of 10,000 patients annually. Their informative yet approachable care empowers individuals to make the best choices for themselves and their families.

A PERSONAL TOUCH

Cypress Surgery Center is defined by the patient experience and its history of offering knowledgeable and compassionate care through the toughest moments. White recounts a particular patient who received a Port-a-Cath for chemotherapy treatments. "She was in tears at the thought of her daughter's approaching wedding, and walking her down the aisle, no hair on her head. A nurse walks in and says, 'I was in your shoes only a year ago, and let me tell you, shopping for my first wig was one of the most fun days of my life.' By the time they were done, everyone was laughing."

It is the mission of Cypress Surgery Center that every patient benefit from our medical advances while being able to relate personally to their providers. The result is a comfortable, patient-focused environment. Compassionate care is our standard.

"Not even our state-of-the-art technology can account for the human spirit and the physician-patient relationship we offer. The intangible—that's what makes a difference."
