

# EXPERT ORTHOPEDIC CARE, CONVENIENT REGIONAL ACCESS

Located between Buffalo and Rochester, Genesee Orthopaedics & Sports Medicine provides high level, state-of-the-art orthopedic care, close to home.

Matthew Landfried, MD

When an orthopedic injury threatens to take you out of the game or limits life's everyday activities, you need the help of an experienced, knowledgeable, board-certified orthopedist—and you need help fast.

Conveniently located on the United Memorial Medical Center campus in Batavia, New York, Genesee Orthopaedics & Sports Medicine provides patients with greater access to personalized, state-of-the-art care. "Every patient is an individual, and every patient gets as much time as needed to resolve all their questions and concerns," says Dr. Matthew Landfried, Chief of Orthopedic

Surgery and a long-running Castle Connolly Top Doctor. "Our approach with patients is collaborative; we want to make decisions together. We strive to make the practice as friendly and comfortable as possible so that patients feel relaxed."

## FROM HEAD TO TOE

The team of physicians at Genesee Orthopaedics consists of three certified providers: Dr. Landfried, Dr. Richard Hoy, and Dr. Nicholas Loffredo. The doctors are supported by seven physician assistants. Together, they bring more than 50 years of combined experience and expertise in diagnosing and treating a wide range of conditions including common sprains and fractures, ligament reconstruction, total hip, knee, and shoulder replacements, and injection placement.

Along with providing leading-edge, comprehensive care, each provider at Genesee Orthopaedics is driven by a mission to create greater access to exceptional care throughout the region. As part of this ongoing commitment, Landfried serves on a U.S. Government Trauma and Critical Care Team and as the team physician for many area high school and semi-professional sports teams. And, as part of the Rochester Regional Health system, the practice offers seamless referrals for subspecialists or additional treatments that will help in a patient's recovery.

"It's my philosophy that if I believe another physician could better help with a specific problem, then the right thing to do is to refer them or suggest a second opinion," says Landfried. "It's this level of transparency that builds the kind of trust that has brought patients back year after year, generation after generation."
