

**why should I get a mammogram?**

because I'm 41 and have never had one  
cancer is no stranger to my family  
there are empty pages on my passport  
cat videos are so fun to share  
I have lots of ideas for kids' birthday parties  
I'll make the best grandmother ever  
because together we're stronger

Getting a mammogram can detect breast cancer in its early stages when treatment is most effective. And that can be the key to living a long and healthy life with those you love. Schedule a mammogram today.
