

# Your best chance to beat breast cancer.

Introducing The Women's Cancer Center.

**Nedra Bonds**  
Breast cancer survivor

If you've been diagnosed with breast cancer, like Nedra, you need an entire team that specializes only in women's cancers. As the region's only National Cancer Institute-designated cancer center, we offer the most treatment options, most expertise and most clinical trials. In fact, a unique clinical trial worked for Nedra. Innovative care can make a lifesaving difference for you and your family, who may also be genetically at risk. Why would you go anywhere else?

Your treatment plan begins with our nurse navigator. Call **913-574-1594** or visit [kucancercenter.org/breast](http://kucancercenter.org/breast).
