Tired of Sinus, Snoring, and Allergy Problems?

Dr. Swerdlin at Sinus & Snoring MD – ENT Family Clinic can help!

At Sinus & Snoring MD – ENT Family Clinic, our practice is built around helping our patients regain proper breathing in order to receive adequate sleep. If you are experiencing nasal congestion, runny nose, sinus pressure, sinus infections, nasal allergies, snoring, or obstructive sleep apnea, we can help.

We utilize the latest technology for minimally invasive, effective surgical and nonsurgical treatments. These procedures are performed in-office with minimal or no discomfort due to the variety of sedation and anesthesia options we offer, including oral, IV, and nitrous oxide sedation.

Our low-radiation CAT scan allows us to better diagnose conditions, and our Fiagon navigation system generates a 3D navigation map that ensures safety, accuracy, and effectiveness of procedures.

We specialize in a range of sleep and snoring services, including home sleep testing and surgical and nonsurgical interventions. We also offer in-office allergy testing and no-shot allergy drop treatments for nasal allergies.

Patients have been turning to Sinus & Snoring MD – ENT Family Clinic since 1997, entrusting their care to board-certified ear, nose, and throat specialist Dr. Hilel Swerdlin. As a fellow and examiner of the American Academy of Otolaryngic Allergy, and with more than 20 years in practice, Dr. Swerdlin has played a role in training new physicians and advancing the development of nasal, sinus, allergy, and snoring interventions.

If you are struggling with these types of issues, contact us today to explore your options. No referral necessary.

Visit SinusandSnoringmd.com or call 262-652-2887 to schedule a consultation.
