

BELIEVE IN LEADING-EDGE CANCER CARE.

You already know Washington Hospital as Southern Alameda County's community hospital. But you may not be aware that we've partnered with UCSF Health to create a leading cancer treatment facility in Fremont, the UCSF-Washington Cancer Center. The Center provides oncology patients with convenient access to the latest cancer research, technology and treatments, along with the finest specialists in the Bay Area. The center's co-medical directors, UCSF physicians Bogdan Eftimie, MD, and David J. Lee, MD, want to redefine what is possible in cancer care, while significantly improving the lives of their patients in a kind and comforting environment.
