

THE DOCTOR IS IN. YOUR POCKET.

The doctor will see you now. And in this age of technology, why not take full advantage of it? With our new **BayCareAnywhere®** app, the doctor is available wherever your smartphone is, 24 hours a day, seven days a week. No more waiting weeks for an appointment or hours in a waiting room. All you need is Internet access and a connected video camera, and patients age 2 and older can be examined by a board-certified doctor. Our specialties include family medicine, pediatrics, internal medicine and more. Based on your visual checkup, doctors can recommend treatment, prescribe medication or let you know if you need to follow up in person with a doctor. Use your smartphone to outsmart the waiting room. Download the free **BayCareAnywhere** app or visit **BayCareAnywhere.org**.
