

GREEN BAY + HEALTHCARE PROFILES

Smile More

Dental Associates Green Bay offers complete dental care to keep your whole family healthy and happy.

“Time to go to the dentist!”

Seldom does one sentence strike such a nerve with all members of the family—kids and parents alike.

Let's face it: no one looks forward to a root canal, and many people even fear regularly scheduled cleanings. But since oral health is vital to overall health, a dentist your whole family can trust is a necessity. Enter Dental Associates Green Bay, an award-winning, full-service practice conveniently located in the heart of downtown since 1994.

Complete Care

Dental Associates Green Bay first opened its doors to the community 25 years ago with a unique oral healthcare model: to provide both general and specialized dental services for the whole family—all under one roof.

Though this streamlined approach to dentistry may seem intuitive by today's standards, it was the exception in the 1970s when Dr. John Gonis founded the first Dental Associates location in Milwaukee. His revolutionary idea took hold: Dental Associates grew from the original location to 14 clinics serving thousands of families in eastern Wisconsin. Today, under the leadership of Dr. Gonis' nephew, Dr. Thomas Manos, Dental Associates is the state's undisputed premier dental care provider from Milwaukee to Kenosha to Green Bay.

“We are proud to provide full-service, quality dentistry for patients of every age,” says Dr. Hassan Alshehabi, one of nine dentists and a host of friendly staff at Dental Associates Green Bay.

“From infants to the elderly—and every age in between—people need to take care of their teeth and gums,” Dr. Alshehabi continues. “We exist to improve your family's quality of life through excellence in oral healthcare. We strive to make it as easy as possible to keep up with your family's dental needs by offering a range of services and specialties at one central location.”

“In the past you'd have a general dentist, a pediatric dentist, and several specialists for things like orthodontics or oral surgery. If you or your child had an issue, you'd first have to go to your

dentist, then be referred to a specialist at a different office. At our practice, the specialists are just a quick walk down the hall.”

Whether you need routine care, sedation dentistry, dentures, gum disease treatment, cosmetic interventions, orthodontic services, or surgical procedures, the experienced team at Dental Associates Green Bay is dedicated to creating a positive, safe, and comfortable visit.

“Our team is the best in the industry,” Dr. Alshehabi says. “From reception to staff to hygienists and surgeons, we are caring and compassionate while providing the very best level of treatment.”

Dental Associates doesn't just care for teeth and gums, however. Each year they care for the community with the “Give Kids a Smile” initiative during Children's Dental Health Month, in which they provide free cleanings and examinations to underprivileged children who would not otherwise receive care. Additionally, doctors and staff teach about dental health in 30 schools annually and have impacted over 81,000 students since 2012.

“We love serving the Green Bay community,” says Dr. Alshehabi. “Our whole team wants to give your family a reason to smile.”
