

DON'T IGNORE THIS MESSAGE. YOUR LIFE DEPENDS ON IT.

ARE YOU AT RISK FOR HEART DISEASE?

Even though you may not have any symptoms, a CT calcium scoring scan can help detect calcium-containing plaque in your arteries, which can cause a heart attack.

**Schedule a scan at
HMHHasHeart.com.**

WOMEN'S HEART ATTACK SYMPTOMS MAY BE DIFFERENT. KNOW THE SIGNS.

Even subtle symptoms can have deadly consequences. Get medical help right away.

Dizziness or fainting

Feeling fatigued

Sweating

Pain in the jaw, back, neck, shoulder or in one or both arms

Shortness of breath

Heartburn-like symptoms, nausea and/or vomiting

CALL 911 RIGHT AWAY

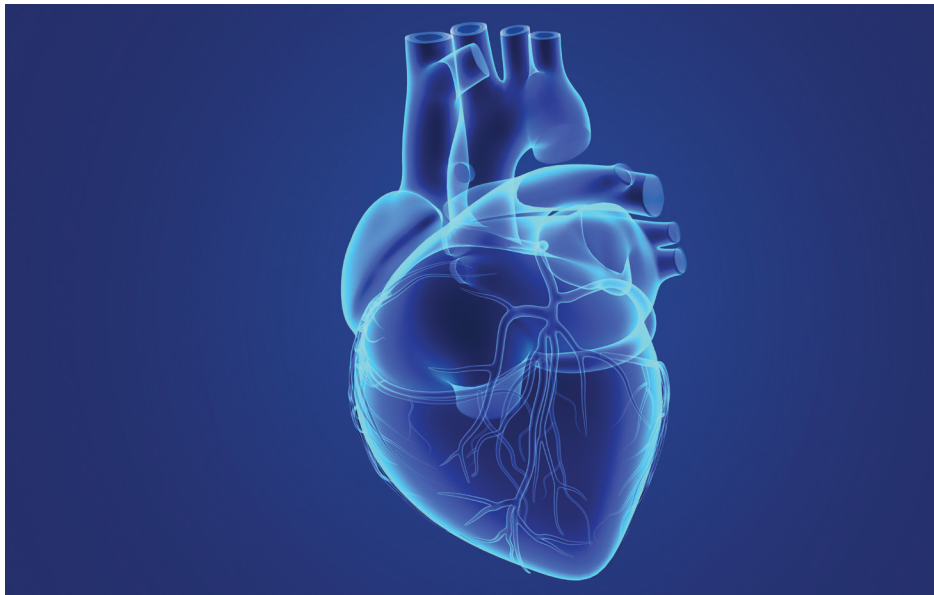

if you think someone you know is having a heart attack.
