

I don't have a secret spot. Of course, that's what I'd tell you even if I did. There's nothing I like better than going off-road into the woods to a pond and seeing if I can pull out some smallmouth bass. But all that almost ended last year when I had stabbing chest pains. Emergency heart surgery at Rhode Island Hospital saved my life. And I am thankful. Of course, there are some local fish who might feel different.
