# SMILE MORE

ARTISTIC TALENT MEETS MEDICAL EXCELLENCE AT  
PARADIGM DENTAL.

**"S**mile makeovers are our passion and our forte, and we take an artistic approach to the practice of dentistry," says Dr. Mike Shalaby, who co-owns Paradigm Dental with his brother and fellow board-certified dentist, Dr. Mark Shalaby. "We create healthy, radiant smiles by offering the best in functional and aesthetic dentistry at our full-service, comprehensive practice."

With both doctors available under one roof, Paradigm Dental provides a vast range of dental services dedicated first and foremost to patient comfort. Whether routine care, sedation dentistry, dentures, gum disease treatment, cosmetic interventions, orthodontic services, or surgical procedures, the experienced team at Paradigm Dental is dedicated to creating a positive, safe, and comfortable visit.

"Going to the dentist should not be painful," says Dr. Mark Shalaby. "We want our patients to be comfortable and at ease, not afraid. Our hope is to help people forget bad past experiences and make your dental visit, comfortable, painless, and, dare we say, enjoyable."

"Our team is the best in the industry," Dr. Mike Shalaby says. "From reception to

hygienists, assistants, and dentists, we are caring and compassionate while providing the very best level of treatment.”

## Art Meets Science

“Both my brother and I began as artists and worked our way through school by making custom apparel and artwork,” explains Dr. Mike Shalaby. “The first time I witnessed a smile makeover, I realized the techniques used combined my love of art with the practice of medicine and would allow me to change patients’ lives for the better.”

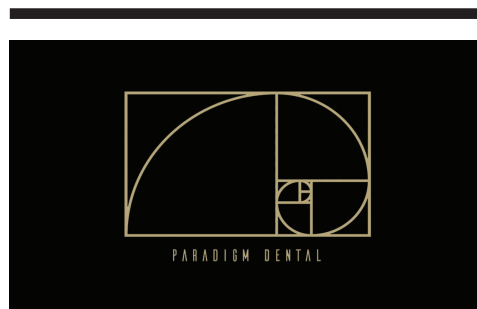

“The way we practice dentistry is a very hands-on, art-centered approach,” Dr. Mark Shalaby adds. “It’s not just aesthetics or oral health; it’s working together in both form and function. There are no cookie-cutter veneers, crowns, or dentures here. Every solution we offer is tailor-made for our client, with their unique bone structure, face shape, and biomechanics taken into consideration.”

## In-House Technology

To create the most effective, bespoke dental solutions, Paradigm Dental offers the most cutting-edge 3D scanning, digital imaging, and lab technologies available and works closely with patients in the process of planning dental interventions.

“With 3D scanning and imaging, we see the sinuses, teeth, and jaw joint from every angle, completely eliminating guess work,” explains Dr. Mark Shalaby. “We can make a 3D model of a patient’s mouth, superimpose it on their scan, and have a comprehensive plan without any need for messy, uncomfortable molds or guesswork.”

“By doing the majority of our lab work and dental product creation in-house, we are able to make the best custom solutions for our patients. We love serving our community and giving everyone a reason to smile more.”
