

I have 3 little mouths to feed.  
I have a 9-to-5 job.  
I have a 5k run in 4 weeks.  
I have six 7-year-olds coming on Saturday.

Also, I have cancer.

Which is why I chose the collective strength of two renowned health care leaders to help me take it on. The Penn Medicine | Virtua Cancer Program is right in South Jersey, with advanced treatment options for breast cancer I can only get here — along with one of the nation's best reconstructive programs. I have a dedicated Virtua Nurse Navigator who helps guide me through this complex journey. Because my life can't stop for my **breast cancer**. And thanks to Penn Medicine and Virtua, it doesn't have to.
