

Premier, Passionate, and Patient-Centered

Gallagher Plastic Surgery & Spa MD provides outstanding, life-changing results.

Dr. Tom Gallagher, founder of Gallagher Plastic Surgery & Spa MD, holds a personal connection to plastic surgery. When he was 5 years old, an animal bite left him with deep lacerations that required extensive repairs. The decision to go into plastic surgery following medical school felt like a natural choice.

With a keen understanding of the need for experience and honesty in plastic surgery, Dr. Gallagher ensures integrity underlies all his practice does. Along with plastic surgeon Dr. David Lo and a team including licensed aestheticians, registered nurses, and a licensed massage therapist, Dr. Gallagher offers both medical and aesthetic plastic surgery and medical spa services. The practice, with three locations across the Knoxville area, elevates the care of the patient above all else.

"Aesthetic surgery is still surgery, and the same respect must be

given to whatever treatment we're supplying," says Dr. Gallagher.

Comprehensive Treatments

"Over the last 10 years, many physicians and non-physicians have begun offering treatments that are FDA approved," Dr. Gallagher explains, "but they do not work under a high level of supervision or education and do not offer a breadth of services." He points to the number of patients who come to him seeking help following procedures performed by physicians who attempted alternative methods to achieve the results only an experienced plastic surgeon can provide.

To ensure patients' goals are met, Gallagher Plastic Surgery & Spa MD offers several surgical and nonsurgical procedures, including medical spa treatments and reconstruction following breast or skin cancer. Laser hair and tattoo removal, blepharoplasties, and body sculpting are a few procedures the practice routinely performs, as well as many injectables and body contouring treatments, such as Botox®, Juvéderm®, CoolSculpting®, and FaceTite®.

"Having the complete toolbox allows us to treat everything across the board," notes Dr. Gallagher. "The ability to offer a variety of services and to listen to patients' goals and expectations is most important to any treatment plan."

Patients First

Most new patients have an idea of what they want, Dr. Gallagher says, but are unaware of the multiple options available to achieve their desired look.

That's why Dr. Gallagher and his team strive to educate patients. "Dr. Google is good in some respects, but clients sometimes come in with incorrect information," he says. "We go out of our way to address patients' needs ahead of time to make sure they're given the information needed to make a decision."

While some plastic surgeons neglect to provide basic aftercare, Gallagher Plastic Surgery & Spa MD sees patient care as its core value. This passion for prioritizing patient care and education fuels Dr. Gallagher's work. "Being given the knowledge and gift to do these procedures is a blessing," he says.
