

A Singular Focus

Bond Eye Associates' state-of-the-art technology and stellar service help generations of area patients stay on the path to clear vision.

September 2020 marked an auspicious anniversary for Bond Eye Associates as they began to celebrate their 40th year of compassionate, exceptional ophthalmology and optometry services for people throughout Central Illinois. "Our motto has always been 'patient care first.' That spirit has never changed and never will," says Illinois native William I. Bond, MD, who founded the practice in 1981.

Bond Eye Associates' staff and physicians are highly trained and continually hone their knowledge and skills through rigorous education and certification in the latest ophthalmological treatments and technologies. Patients receive leading-edge treatment for glaucoma, cataracts, injuries to the eye, strabismus, retinal diseases, and more. Newer procedures such as corneal cross-linking can save and preserve the vision of patients diagnosed with keratoconus, a bulging of the cornea. "We are proud to provide world-class ophthalmology right here in your hometown," says Dr. Bond. "Patients of all ages come to us for answers; for four decades, it has been our privilege to help them with every aspect of vision care."

“

It's important to protect your vision by scheduling regular eye exams. Catching serious eye diseases, such as glaucoma and certain cancers, in their earliest stages can mean the difference between sight and blindness.

Dr. William I. Bond, Founder and Medical Director, Bond Eye Associates

”

The family-owned practice is recognized as a center of excellence by major pharmaceutical and medical device manufacturers nationwide. Bond Eye Associates surgeons are continuously sought out to conduct clinical trials on new medications and technologies. "We were part of the original 2003 study that approved LASIK," says Dr. Bond. "We had the first excimer laser in Central Illinois, and we've continued to practice at the forefront of this revolutionary—and life-changing—technology. Patients who have worn glasses their whole lives can suddenly see without them."

Where Vision Meets Fashion

In addition to the very latest LASIK laser treatments, lens implants that can restore sight in just a few visits, and a full array of contact lenses, the practice's optical boutique offers frames for every fashion sense. Whereas other optical boutiques often charge extra for blue light filters, anti-reflective treatments, polycarbonate lenses, impact-resistant technology, and high-index lenses, these valuable options come standard at Bond Eye Associates.

"Personalized service is at the heart of every patient interaction,"

says Dr. Bond. "We get to know our patients. In many cases, we are now treating the children and grandchildren of patients who came to us when we first opened. That's uniquely satisfying."

With offices in Peoria and Pekin, Bond Eye Associates invests in the latest surgical and diagnostic equipment available. In addition to providing comprehensive eye care and optical solutions for the entire family, specialized services include:

- Cataract surgery
- Laser vision correction
- Premium lens implants
- Diabetic eye care
- Diagnosis and treatment for glaucoma, dry eye, and macular degeneration
