MED SPA

Confidence Boost: The Ultimate Self Care

For minimally and noninvasive enhancements,
choose the local experts.

Not all med spas are created equally, and Dayton's locally owned and medically staffed Pure M.D. stands ahead of the industry.

Helmed by Dr. Suresh Gupta, an experienced physician with over three decades of medical expertise, Pure M.D. boasts four regional locations offering the world's most state-of-the-art technology for noninvasive and minimally invasive treatments of the face, body, and hands.

From gentle liposuction and skillful tattoo removal to wrinkle reduction and fuller lips, Pure M.D. is the one-stop local expert for boosting confidence—both inside and out.

"Whatever we do, we have great results. We don't charge for touch-ups or follow-ups. My patients have my cell

phone number, and I'm available evenings and weekends to attend to their concerns," Dr. Gupta says. "That's a level of personal care that's hard to find at a national med spa chain whose providers live in a different city."

The Gold Standard

Pure M.D. has invested in the most advanced technology available, including premier brands like Sciton®, InMode, Cynosure, CoolSculpting®, and dozens more. This deep service selection ensures each patient receives the most appropriate treatment to achieve their customized goals.

"It's not about vanity; it's about confidence," Dr. Gupta says. "Whether you're postpartum, recently divorced, needing tattoo removal, immobilized by

scar tissue, or interviewing for a new job, we want you to feel good about yourself so that you can confidently embark on your next chapter. It's about creating opportunities."

Weight Loss and Women's Health

New to the Pure M.D. family is a specialized facility dedicated exclusively to women's health and wellness. At the Weight Loss and Women's Health center, intimate concerns such as vaginal atrophy, urinary stress incontinence, and low libido are addressed with sensitivity and discretion, and weight loss options provide clients with personalized programs tailored to their unique needs.

Fat transfer is one of many options that Pure M.D. offers for weight loss. Using microlaser and radiofrequency technology for the liposuction, fat is first melted and removed from unwanted areas in the thighs, stomach, or arms. That same fat is then injected into the breasts, buttocks, or cheeks to enhance fullness, creating a full-body transformation that boosts confidence and mobility.

"Pure M.D. and our sister facilities aim to care for the entire patient, head to toe," Dr. Gupta says.

A few of the many services available at Pure M.D. include:

Laser skin treatments

SmartLipo

Fat transfer

Cellulite and fat reduction

Skin tightening and lifting

Laser hair removal

Tattoo removal

ZO® Medical Facials

Chemical peels

Botox®

Fillers

Weight loss

Women's health

In addition to his work with Pure M.D., Dr. Suresh Gupta is the founder of DOC Vein Management, a Dayton clinic offering treatment for chronic venous insufficiency, varicose veins, spider veins, and more.

Treating these often neglected conditions not only creates more attractive legs, but also restores mobility and prevents more serious health problems such as variceal bleeding and blood clots.
