

THE ONE-STOP DESTINATION FOR BODY TRANSFORMATION

Southern Surgical Arts is Tennessee's most robust practice for inner and outer enhancement.

Cosmetic surgery practices are easily accessible in every major city, but there's a reason people are flocking from all corners of the U.S.—and the globe—to rejuvenate their bodies at Southern Surgical Arts in Chattanooga: This practice offers an experience unlike any other.

"We're a three-story building with three triple board-certified physicians, a world-accredited teaching facility, level four anesthesia, and everything you could ever need to enhance your body and mind—all under one roof," says Joseph Bastow, manager of marketing and social media at Southern Surgical Arts.

The impressive list of transformative services includes body and facial plastic surgery (such as facelifts, rhinoplasties, and blepharoplasties), a vein institute, a medspa with two full-time nurse aestheticians, a wellness spa, hair loss services, hormone optimization and weight loss services, and sexual health consultations.

Though the practice offers an expansive suite of services, the deep resources and expertise of the clinic ensure each patient receives a personal, attentive, and fully customized experience. "No patient is the same, so no procedure is either," says Bastow.

Inquiring to the practice for information based on individual goals is risk free. Whether prospective patients are just beginning to explore their options or are ready to commit, all consultations are complimentary and can be completed either virtually or in-person at the patient's convenience.

Mommy Makeovers

While carrying and birthing children can be a beautiful experience, it's also one that takes a toll on the body. Fortunately, there's hope in reclaiming the vibrancy of a pre-partum body and helping women feel like themselves again.

"Our Mommy Makeover services address the most common complaints of women who have had children. We can offer tummy tucks and breast augmentations or reductions in the same surgery, along with other services, if desired," says Bastow.

Thanks to the high volume of its patient demand, Southern Surgical Arts is proud to offer the lowest breast augmentation prices in the country. An all-inclusive price tag of \$5,900 includes a full range of implant options, including the popular "gummy bear" implant, and general anesthesia performed in the practice's on-site surgical suite. "We're completely transparent in our costs; there are no hidden fees. The price you're quoted includes absolutely everything," says Bastow.

Anyone, Anywhere

Some patients, including many men, opt for high-definition VASER-assisted liposuction that chisels away body fat to reveal lean, toned muscles. "This technology can define existing muscle tone and bring out six-pack abs for just about anyone of average weight," says Bastow.

Patients of all ages, genders, and walks of life have found hope and renewed confidence in the head-to-toe possibilities of Southern Surgical
