

CARE FROM THE HEART

The Heart Institute at Children's Hospital Los Angeles is ranked among the top pediatric cardiac care programs in the nation by U.S. News & World Report and is the largest pediatric cardiac center in the Western United States. Families from across the U.S. and around the world come to the Heart Institute for the expertise of specialists in all forms of pediatric and congenital heart disease, including congenital cardiac surgery, cardiothoracic transplantation and cardiac intensive care.

Beginning with the first pediatric heart surgery on the West Coast in the 1930s, the Heart Institute has a history of treating small hearts with big problems. Nearly a century later, the Institute continues to take on the most complex cases and guide them to the best possible outcomes for our patients and families.
