

Live well.
Age well.
Be well.

Bustling with activity, that's how the Malliks live well, age well, and be well. After relocating to be closer to family, they looked at nearby Judson. After that, there was no looking back, and they instantly knew they had found home. Gardening, reading, staying fit and freely sharing interests with a great group of people are everyday occurrences for the Malliks.

"We're so busy! Just because we are retired doesn't mean we're going to sit in a chair and sleep. People are so friendly, and help is here if you need it, which gives us and our children peace of mind."
