

GREATER BUFFALO HEALTHCARE PROFILES

SOMETHING TO SMILE ABOUT

Buffalo General Dentistry opens the door to renewed confidence and restored lives.

Dr. Dan Jammal alongside his wife, Dr. Tamara Dawli, M.D.

Buffalo General Dentistry has redefined the modern dental practice by incorporating the most up-to-date procedures under one roof, with the

familiarity and personal touch of a bygone era.

They focus especially on dental implant reconstruction procedures like Teeth in a Day.

"This is a procedure where patients can ease their anxiety with various levels of sedation available and literally wake up with a functional new set of permanent teeth that look amazing, in a single visit," says Daniel Jammal, DMD.

Buffalo General Dentistry is one of the few elite practices that has the necessary technology and experience to perform these procedures.

"We treat people and our patients with dignity and respect. It's missing nowadays, and it's been missing in healthcare," Dr. Jammal says. "Patients are scared and embarrassed whether they show it outwardly or not. What I truly respect and admire is that invisible

“Buffalo General Dentistry embodies our wishes for the world and future generations: more humanity.”

thing within our patients that got them to come, that motivated them to end up in our dental chair. Maybe they've decided it's time to make a change, take care of themselves, or break a negative cycle of self-neglect. They are going way outside their comfort zone to take this big step, and we get to cheer them on all

the way to the finish line.

"Be the change you wish to see in the world."

This quote follows us around," he continues.

"Buffalo General Dentistry embodies our wishes for the world and future generations: more humanity. Our team is fortunate to be using our unique gifts and talents to make a positive change in our own little way.

"When a father can walk his daughter down the aisle without embarrassment, or a grandmother finally allows herself to smile at her grandkids for the first time, you realize a lot of things. We aren't just giving patients a new smile; we give them their life back. Anyone you meet at our practice is absolutely hooked, addicted, forever chasing that feeling. That is why we do what we do."

Buffalo General Dentistry offers a wide variety of general dental services with a specific focus on dental implant reconstruction and cosmetic dentistry such as veneers and Invisalign®. The service mix also includes sleep apnea treatment using specialized mouthguards as an alternative to CPAP.
